

# Case 1: no preferences or priors

# Case 2: Priors in the wrong context (still no preferences)

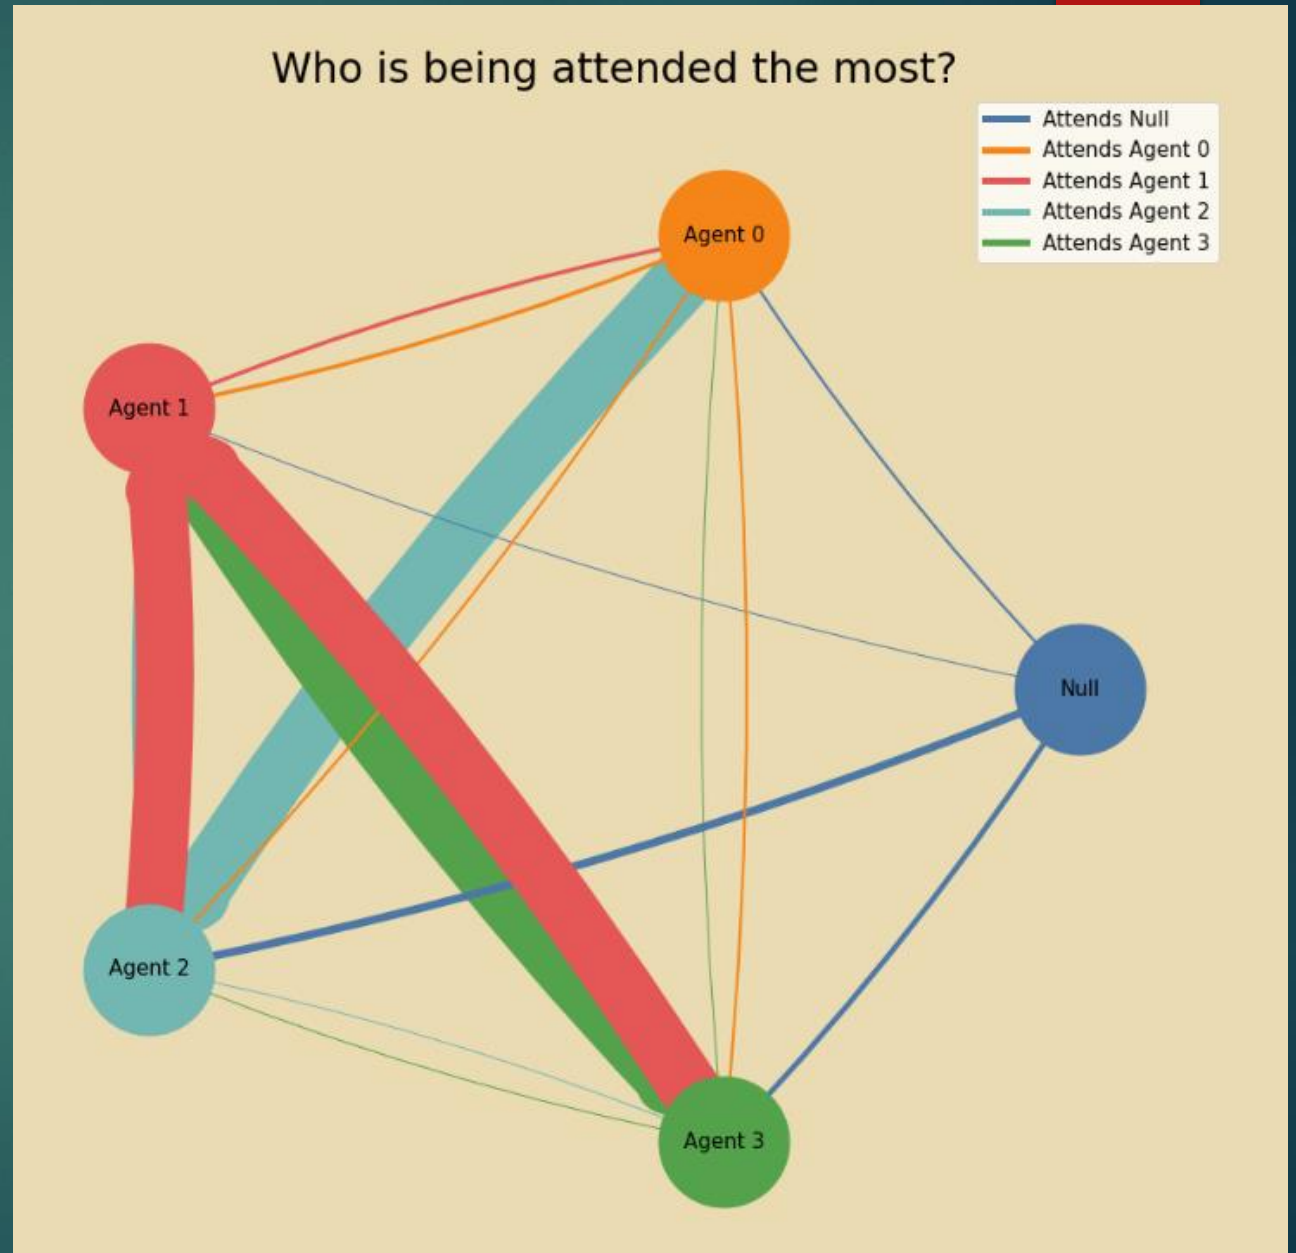

(in anything relating to the context imposed in the simulation)

# Attendance network

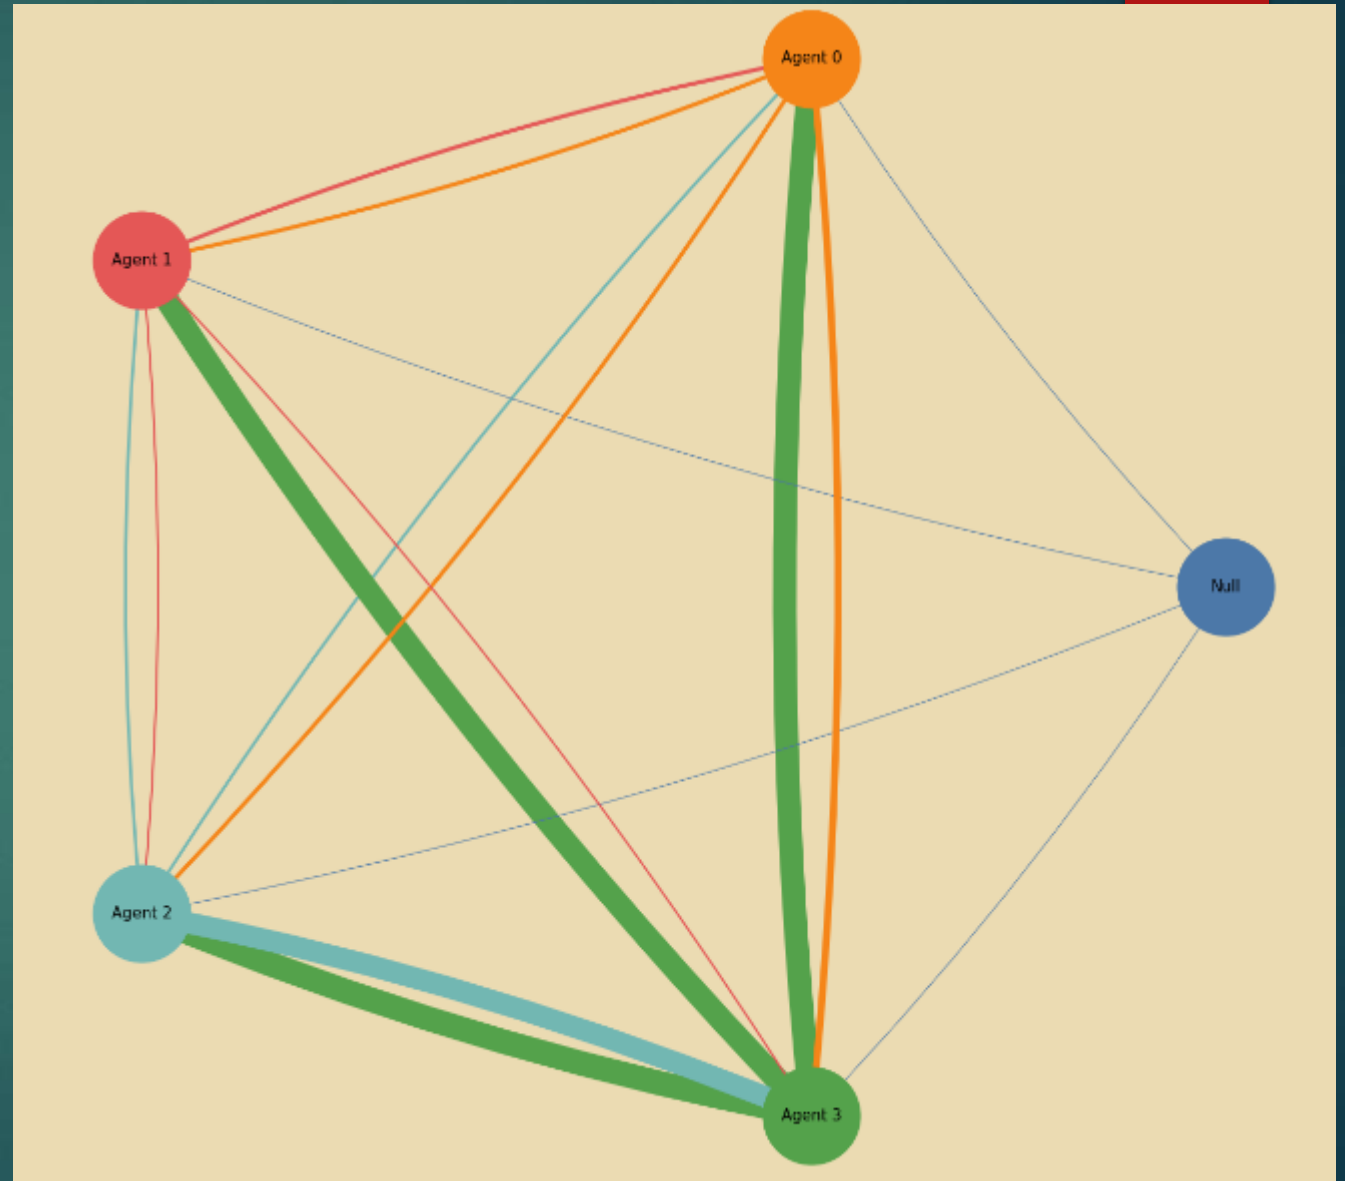

Celebrities (Agent 1 & 2)

Social « isolation » (Agent 0)

# Attendance network

Agent 3 is rationally tweeting fake news (and gets all attention)

# Attendance network

No celebrity situation

# Another interesting situation

« Cognitive  
Dissonance »

« Fake it until  
you believe it »

« Social  
influence »
